

Advances In Carbohydrate Chemistry And Biochemistry Volume 47

Advances In Carbohydrate Chemistry And

In contrast, most people are fond of and tolerate sucrose (see Figure 2). Sucrose is produced by plant cells; it is one of the major products of photosynthesis. It contains glucose and fructose molecules linked across the anomeric carbons of both (the C-1 of glucose and the C-2 of fructose).

Disaccharides - Chemistry Encyclopedia - number, name ...

Bioorganic chemistry is a rapidly growing scientific discipline that combines organic chemistry and biochemistry. However medicinal chemistry in its most common practice focusing on small organic molecules encompasses synthetic organic chemistry and aspects of natural products and computational chemistry in close combination with chemical biology, enzymology and structural biology, together ...

Not to be confused with glucan.. The terms glycan and polysaccharide are defined by IUPAC as synonyms meaning "compounds consisting of a large number of monosaccharides linked glycosidically". However, in practice the term glycan may also be used to refer to the carbohydrate portion of a glycoconjugate, such as a glycoprotein, glycolipid, or a proteoglycan, even if the carbohydrate is only an ...

As a food source. Chlorella is a potential food source because it is high in protein and other essential nutrients; when dried, it is about 45% protein, 20% fat, 20% carbohydrate, 5% fiber, and 10% minerals and vitamins. Mass-production methods are now being used to cultivate it in large man-made circular ponds. It is commonly used as a 'superfood' and can be found as an ingredient in certain ...

Chemistry - Stony Brook University, New York

This review describes recent advances on the application of cellulose nanocrystals (CNCs) in selected applications. CNCs are produced via acid hydrolysis of cellulosic materials, such as wood, cotton, tunicate, or other biomass.

Recent advances in the application of cellulose nanocrystals

About ACS Symposium Series eBooks. The ACS Symposium Series, part of the ACS eBooks, are the high-quality, peer-reviewed eBooks developed from ACS technical divisions' symposia. Each chapter is carefully authored by an expert in the field, and the collection of chapters edited by an internationally recognized leader in the field.

ACS Symposium Series (ACS Publications)

David Julian McClements is a Distinguished Professor at the Department of Food Science at the University of Massachusetts. He specializes in the areas of food biopolymers and colloids, and in particular on the development of food-based structured delivery systems for bioactive components.
