The universal motor is a type of electric motor that can operate on either AC or DC power and uses an electromagnet as its stator to create its magnetic field. It is a commutated series-wound motor where the stator's field coils are connected in series with the rotor windings through a commutator. It is often referred to as an AC series motor. The universal motor is very similar to a DC series ...

Hospital gowns worn by patients are designed so that hospital staff can easily access the part of the patient's body being treated. The hospital gown is made of fabric that can withstand repeated laundering in hot water, usually cotton, and is fastened at the back with twill tape ties. Disposable hospital gowns may be made of paper or thin plastic, with paper or plastic ties.
