Masculinity (also called manhood or manliness) is a set of attributes, behaviors, and roles associated with boys and men. As a social construct, it is distinct from the definition of the male biological sex. Standards of manliness or masculinity vary across different cultures and historical periods. Both males and females can exhibit masculine traits and behavior.

In gender studies, hegemonic masculinity is part of R. W. Connell's gender order theory, which recognizes multiple masculinities that vary across time, culture and the individual. Hegemonic masculinity is defined as a practice that legitimizes powerful men's dominant position in society and justifies the subordination of the common male population and women, and other marginalized ways of ...

Introduction. It seems pro forma to begin an article on feminism deploring the fact that mainstream criminologists do not "get it." This work, however, is authored by someone who herself did not always "get" feminism and only in recent years has come to recognize feminist insights as not just helpful to understanding the relationship between gender and crime, but essential.

This article discusses the gendered nature of politics (as practice) and political science (as an academic discipline). It studies the sex-typing characteristic of most institutions in the modern world and describes how gender shapes the ways people organize, think, and know about the world. The article then identifies the changes that have occurred in politics and political science over the ...
