

Human Development And Interaction In The Age Of Ubiquitous Technology

Human Development And Interaction In

Human-computer interaction (HCI) researches the design and use of computer technology, focused on the interfaces between people and computers. Researchers in the field of HCI both observe the ways in which humans interact with computers and design technologies that let humans interact with computers in novel ways.

The Human Development Index (HDI) is a statistic composite index of life expectancy, education, and per capita income indicators, which are used to rank countries into four tiers of human development. A country scores a higher HDI when the lifespan is higher, the education level is higher, and the GNI (PPP) per capita is higher. It was developed by Pakistani economist Mahbub ul Haq, with help ...

Human Migrations. Unsustainable interaction between people and ecosystems has often been associated with human migrations. When people move to a new area where the ecosystem is different, they typically have little knowledge about the new ecosystem and lack appropriate social institutions and technology for sustainable interaction. This appears to have occurred when the first human inhabitants ...

Sustainable Development. Unintended consequences such as the ones in the story about fishing and marine animals are not unusual. Many human activities impact the environment in ways that are subtle or inconspicuous or involve changes that are so slow that people do not notice what is happening until the problem is serious.
