Smoking is the leading preventable cause of death in the United States. 1 In an effort to target public health interventions, recent studies have focused on smoking in distinct populations, such as pregnant women 2 and adolescents. 3 We believe those with mental illness are another group that merits special attention. Previous studies have found high smoking rates among selected populations of ...

Food has not generally been associated with changes in small intestinal transit time, and its effects are assumed to be negligible (Davis et al., 1986), but studies have generally followed a regimented fed/fasted design, in which a dosage form is administered with food, or on an empty stomach. The timing of food ingestion may make a difference to the small intestinal transit time of a dosage form.

More than one evaluator can be evaluated at a time. If you have both a `GL_MAP1_VERTEX_3` and a `GL_MAP1_COLOR_4` evaluator defined and enabled, for example, then calls to `glEvalCoord1()` generate both a position and a color. Only one of the vertex evaluators can be enabled at a time, although you might have defined both of them.
