A city block, urban block or simply block is a central element of urban planning and urban design.. A city block is the smallest area that is surrounded by streets. City blocks are the space for buildings within the street pattern of a city, and form the basic unit of a city's urban fabric.

### **City block - Wikipedia**

Narrow lot houses are quite rare. Obviously, the preferred alternative would be a more spacious home with a different floor plan. However, a narrow lot house does have its advantages, the most notable of which is the fact that it can fit in tight spaces between existing buildings or on unusually-shaped sites.

Wind occurs because of horizontal and vertical differences (gradients) in atmospheric pressure. Accordingly, the distribution of winds is closely related to that of pressure. Near the Earth's surface, winds generally flow around regions of relatively low and high pressure—cyclones and anticyclones, respectively. They rotate counterclockwise around lows in the Northern Hemisphere and clockwise ...
