What Is The Emerging World

An emerging power or rising power is a term used as recognition of the rising, primarily influence of a nation—or union of nations—which has steadily increased their presence in global affairs. Such a power aspires to have a more powerful position or role in international relations, either regionally or globally, and possess sufficient resources and levels of development that such goals ...

An emerging market is a country that has some characteristics of a developed market, but does not satisfy standards to be termed a developed market. This includes countries that may become developed markets in the future or were in the past. The term "frontier market" is used for developing countries with smaller, riskier, or more illiquid capital markets than "emerging".
